                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        colon and blood.

DISBASE: Involved in a t(1;14)(q21;q32) chromosomal translocation DISBASE: Involved in a t(1;14)(q21;q32) chromosomal translocation found in a partient with precusor B-cell acute lymphoblastic leukemia (ALI). This translocation leaves the coding region intact, but may have pathogenic effects due to alterations in the expression level of BCL9. Several cases of translocations within the capression level of BCL9 several cases of translocations within the capression level of BCL9 have been found in B-cell
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                s SWISS-PROT entry is copyright.
